

# Halden Kavanagh

Full Stack Developer - Elixir / Phoenix

(303) 656-1558 | haldenkav@gmail.com | linkedin.com/in/HaldenKavanagh | Boulder, CO 80303

## PROFESSIONAL SUMMARY

Full Stack Developer with two years of production experience shipping SaaS applications in Elixir and Phoenix LiveView. I've delivered 135+ features and fixes (320 story points) on a live CRM, co-architected a commerce system with custom WordPress/WooCommerce plugins, and built a company marketing site from scratch. I work comfortably across the whole stack: real-time UI, backend logic, database design, and design systems. I pick things up fast and lean on AI-assisted workflows to move quickly.

## EXPERIENCE

RazoyoBoulder, CO · May 2024 - May 2026

Software Developer (promoted from Web Development Intern)

Full-stack developer across three production products: a CRM, a commerce chat platform, and the company website.

**Matrix** - CRM SaaS · Elixir / Phoenix LiveView

- Shipped **135 issues (320 story points) over 20 months** in a production Phoenix LiveView CRM: 66 features and 63 bug fixes.
- Built the application's **Algolia-powered global search** from proof-of-concept to production, including the core search component.
- Designed and built an **attribution system** that required careful data modeling and up-front architectural analysis.
- Resolved **urgent production issues**, including a data-integrity bug where opportunity records reverted and cleared user data.
- Delivered CRM data import/export, contracts & e-signature workflows, dashboard widgets, and CSV/reporting features.

**Kenzi** - commerce chat platform · WordPress / WooCommerce · DaisyUI

- Co-architected the commerce system** and authored the product's **WordPress + WooCommerce PHP plugins**.
- Built the full front-end theme in **DaisyUI**, owning the styling, UI features, and bug fixes.

**Razoyo Website** - marketing site · Hugo / CloudCannon

- Built the company marketing website **from scratch** (Hugo + CloudCannon, **460+ commits**): a large, content-rich site with blog and custom features in JavaScript and Go.
- Created a reusable **component library** and a **CMS workflow that let the non-technical marketing team manage the site independently**.

## SKILLS

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Languages & Core       | Elixir, JavaScript (ES6+), PHP, Go, SQL, HTML, CSS                                                                             |
| Frameworks & Libraries | Phoenix LiveView, React, React Native, Node.js, Tailwind, DaisyUI, WordPress/WooCommerce, Hugo                                 |
| Data & Search          | PostgreSQL/MySQL, MongoDB, GraphQL, REST APIs, Algolia                                                                         |
| Practices              | Domain-Driven Design (DDD), OOP, component libraries / design systems, production debugging, architectural analysis & planning |
| Tooling                | Git/GitHub, Google Cloud Console, CloudCannon (CMS), Figma, Jira, AI development tools (Claude Code / LLM-assisted workflows)  |

## EDUCATION

|                                                                |                     |
|----------------------------------------------------------------|---------------------|
| Certificate, Full Stack Web Development - University of Denver | Nov 2023 - Feb 2024 |
| General Studies - Fort Lewis College, Durango                  | Aug 2021 - May 2022 |

## EARLIER EXPERIENCE

Before moving into software, I worked front- and back-of-house in busy restaurants (Stellas Cocina, Chautauqua Dining Hall, Torchy's Tacos, 2018-2023), where I learned to keep my head under pressure, communicate across a team, and train new hires.
